DETAILED ACTION

Drawings

1. The drawings were received on 8/30/04. These drawings are acceptable.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claims 1, 11, 12, 13, and 17 recite a vehicle with an impeller and that the vehicle is guided (or steered) by selectively altering the pitch of certain blades of the impeller. An *impeller* is *internal* to the vehicle. Any localized force on the blades of the impeller will necessarily be cancelled out by the hub of the impeller and/or the walls of the duct in which the impeller is disposed. The only resultant force vector is that which flows outward from the impeller duct. In contrast, the prior art documents show external *propellers* that create forces on the vehicle by acting on the fluid medium *external* to the vehicle. The specification does not sufficiently describe how varying of the pitch of the impeller blades steers or guides the vehicle. Claims 2-10 and 14-16 depend from the independent claims and are rejected for the same reason.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-17 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The invention is inoperative in that it cannot steer or guide the vehicle by selectively altering the pitch of impeller blades as claimed. See the explanation in Paragraph 3, above.

Response to Arguments

6. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
